

**REMEMBER THE PAST.
BUILD THE FUTURE**

CONSTRUCTION COMPANY MAPID

MAPID is the largest multiprofile construction company of the Republic of Belarus. An undisputed leader in the field of residential development.

The introduction of the newest technologies of the construction industry allows to construct residential houses on a "key ready" basis for an average of 9 months.

CONSTRUCTION COMPANY MAPID

Traditionally works with large objects, including ones in big cities in complicated settings of a busy urban infrastructure.

In addition to multi-storey residential buildings, all construction services of hotels, business centers, low-rise buildings, cottages and infrastructure facilities are conducted.

CONSTRUCTION COMPANY MAPID

The main advantage is an integrated development approach.

MAPID functions as an investor, developer, principal contractor, subcontractor. It is capable of performing individual types of work as well as full development cycle.

CONSTRUCTION COMPANY MAPID

MAPID today comprises 17 departments, for which nothing is impossible.

- Industrial group
- Project group
- Mounting group
- General contracting group
- Department of small-scale mechanization
- Finishing Group

Seven thousand of our specialists provide all types of work on the construction of housing - from the excavation to the delivery a "key ready" apartment.

MAPID OPERATES:

- own modern proprietary highly-efficient equipment of the world's top brands – Liebherr, Caterpillar, HAM, Voegele, Komatsu, Case, Bauer, Ammann;
- more then 800 units of construction, road and automotive machinery;
- own in-house production of construction materials: concrete products, steelwork, finish materials, windows and doors, amenities.

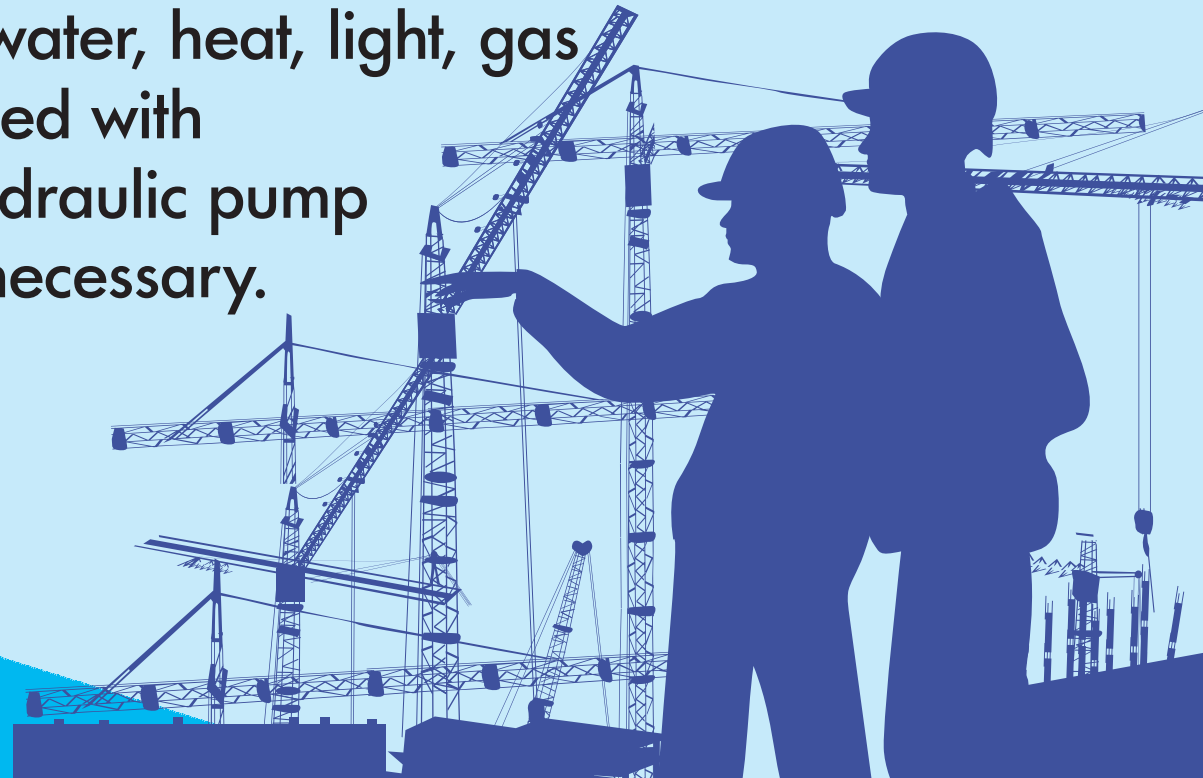

CONSTRUCTION COMPANY MAPID

MAPID provides the full complex of construction site, excavation and foundation laying.

Upon the completion of a building MAPID provides: complete installation of utility systems – both interior and exterior;

all types of lines – water, heat, light, gas

Objects are equipped with transformer and hydraulic pump substations where necessary.

CONSTRUCTION COMPANY MAPID

Our specialists implement finishing and face works of all kinds.

Cutting-edge materials are used per customer's request (Venetian plasters Oikos, as well as Caparol, Alpina, Ceresit brands).

The development ends with landscaping, lighting and traffic organization.

CONSTRUCTION COMPANY MAPID

The company develops 650 thousand square meters per year.

Maximum capacity of one palette circulation line launched in 2016 is 170 cubic meters per day, 5 to 6 two-room apartments.

CONSTRUCTION COMPANY MAPID

The basis of MAPID's production facilities is "key-ready" principle.

Prefabricated reinforced concrete houses from MAPID are the highest speed of design, construction, factory accuracy of surfaces, top quality of construction controlled at every stage.
